**TLP-102**  
**Computer/Telephone Audio Adapter**  
**P/N 39041**

The TLP-102 Telephone Recording Adapter adapts most single or multi-line phones, analog or digital, to your computer soundcard. It provides a clear audio signal, containing both sides of the phone conversation, to your computer soundcard. When used with web conferencing software, it allows you to record the telephone audio portion synchronized with your conferencing software.

The TLP-102 connects quickly and easily, with no special tools, to the telephone via the modular handset connector. See the diagrams and installation instructions below.

**INSTALLATION INSTRUCTIONS**

- 1 Unplug the coil cord from the base of the phone and plug it into the modular jack on the TLP-102.
- 2 Plug the short (~12 inch) cable on the TLP-102 into the phone base where the coil cord was plugged.
- 3 Plug the long (~6 foot) cable on the TLP-102 into the Mic Input of your sound card.

That's it!

See below for handset and headset instructions.
