Instructions
Telephone Logger Patch TLP-104
P/N 43837 B Series

The TLP-104 provides an analog audio connection to loggers/central recorders from telephones that have modular connected handsets. The TLP-104 will provide a clear recording of both sides of your conversation from almost all telephones whether they are the digital phones or analog. The TLP-104 has no significant effect on the telephone operation. A recording will be made whenever the handset is used.

Note: The central two conductors of the RJ11 jack (pins 3 & 4) carry the analog audio.

Instructions

Telephone Logger Patch TLP-104

P/N 43837 B Series

To install the unit, disconnect the handset coil cord from the base of the telephone and replace it with the mini-mod plug from the TLP-104. Connect the handset coil cord into the mini-mod jack on the TLP-104. Connect the line cord from the logger into the RJ11 jack on the TLP-104. The unit may be mounted at a convenient location on the base of the phone with the adhesive pad.
